

Short time training report 2015.june.19-aug 01

Adilsaikhhan Mendjargal

I appreciate to Professor Eguchi.S and his team members who gave me good practice and support during the time of training. My training schedule comprised regular conferences on preoperative and post operative patient evaluation, daily ward round, weekly conferences with NCT and ICT. On 25 July 2015 introduced opportunity of participation in "Trans-ARIAKE Liver Transplantation Forum. Main part of my practice was observation of Hepato-pancreatico biliary surgical operation and Living donor liver transplantation and its pre and post operative patient care. During the time of my study I was included in operation team member for 2 cases LDLT and 12 laparoscopic and open liver resections. The training provided me with an opportunity to observe various advanced laparoscopic surgical methods in the real world such as Hybrid operation for LDLT donor right hepatectomy. After work we had nice time to sightseeing in the area of nice city Nagasaki (Shimabara, Omura city). Specially thank to Professor HIDAKA.M for his fruitful and friendly supervise.

I hope for our future cooperation

Your sincerely

Adilaa
