

The good time in Japan

翁

Since coming with a bit of nervousness from Guangzhou city in the 3 hours flight, now , I am getting more and more use to the Nagasaki city life in Japan. Although there no fast speed traffic and very tall buildings here, but the quiet、 safe and concordance environment and the unique history make every traveler in deep impression. The people here keep the open doors for the guest all the time. The professor and doctors' continue and hard working attitude will affect me for the last of my life and the high-caliber service in Nagasaki University Hospital impresses me indeed. The department of surgery has the very high level in clinic and research in Japan. Everyone here is my good teacher. Although the culture in here are somehow different form that in china , I gradually adopt to it and enjoy most of the new thing here, for example the parties with the staff、 the festival days held in traditional ways and the fresh sea food. How time fly, almost one year will pass on, I will try my best to treasure the time with and learn more from the teachers and friends here. The good time in Nagasaki which filled with beautiful sunshine、 fantasy islands and passionate inhabitants will be a unforgettable remember in my mind.
