

福岡

Fukuoka

Dazaifu Tenmangu Shrine

An important shrine in the Shinto faith, Tenmangu Shrine is a place of worship for the god of learning Sugawara no Michizane, and is one of Fukuoka's major tourist attractions.

Kokura Castle

The area around Kokura Castle has the distinct feel of old-time Japan. In addition to the historic castle, you can also visit the Kokura Castle Japanese Garden.

Aso Mountain

Cows and horses can be seen grazing in the open fields near the unique and huge caldera of Aso. Many people from all over the world enjoy visiting the Aso area year-round.

Yatai

Yatai (food stalls) are one of Fukuoka's most famous attractions. Yatai are most concentrated in Tenjin, Nagahama and Nakasu areas.

Venue

会場

Dear Colleagues,

On behalf of the organizing committee, it is my pleasure to invite you to participate in the 13th Asian Australasian Congress of Anesthesiologists to be held in Fukuoka, Japan, June 1-5, 2010.

This important scientific event provides an invaluable opportunity for both general and subspecialized anesthesiologists to learn about new developments in the fields of anesthesia, pain clinic, critical care, emergency medicine and palliative care.

The theme of the Congress is set as **"Safety & Challenge"**, and the focus of the scientific program will be on state of the art presentations as well as new insights into basic science, clinical research and therapeutic interventions.

Fukuoka is located on Kyushu Island which is the south-western part of Japan. Because of its geographical location, Fukuoka has been a gateway to Asian neighboring countries, and a center of cultural, political and economical interactions in East Asia. This city is not only rich in history or nature; it is a vibrant and beautiful city.

We very much hope you will join us in Fukuoka, in the 13th AACA, for what we anticipate to be a friendly and scientifically rewarding congress.

Koji Sumikawa

Koji Sumikawa, M.D., Ph.D.
Chairman, Organizing Committee
The 13th AACA

Main Theme: Safety and Challenge

Lectures and Symposia

- Anesthesia Benchmarks and Evidence-Based Care
- New Strategies for Perioperative Organ Protection
- Highlights on Regional Anesthesia Techniques
- Update on Transplantation Medicine
- Newly Emerging Clinical Impact of Genetics
- Standardization of Perioperative Assessment
- Innovations in Critically Ill Patients' Care
- Next Generation of Organ Assist Devices
- Ethics and Medicolegal Issues in Intensive Care
- New Insights into Management of Chronic Pain
- Current Status of Palliative Medicine
- Inspiring Education for Students and Residents
- Social Issues Surrounding Anesthesiologists

Workshops

- Difficult Airway Management
- Transesophageal Echocardiography
- Ultrasound for Nerve Block and Catheterization
- Neuromonitoring
- Percutaneous Cardiopulmonary Support
- Hemodiafiltration
- Crisis Management
